Basil M. Al-Isa

+90-539-892-0128 | basilkawak@gmail.com | GitHub | Portfolio | LinkedIn

Results-oriented Front-end Developer dedicated to creating and optimizing interactive, user-friendly, and feature-rich websites. Leverage analytical skills and strong attention to detail in order to deliver original and efficient web solutions, provide technical knowledge and expertise, build new websites from start to finish, and successfully manage a team of other software professionals.

TECHNICAL PROJECTS

Suicide Detection & Prevention - Github | Demo
Provide a quick and simple platform for suicide prevention and mental health promotion.
+ Developed user interface employing React.js with Bootstrap for styling.
+ Created reusable functional components following S.O.L.I.D. principles reduced code complexity.
+ Composed unit, integration and e2e tests using Jest helped the development process work smoothly.
+ Utilized the WordPress API as the content management system that allowed the client a simpler usage of content adjustments for further changes.

Movie Website - Github | Demo
Web application for movie and television information, similar to IBDb.
+ Implemented HTML5, CSS3, and JavaScript to structure the pages and info model.
+ Used Bootstrap 4 to create responsive pages for use on different sizes of screens.
+ Utilized TMBD API to fetch data and render information for movies, actors, etc, and to do sorting and searching through the given API.

To-do App - Github | Demo
Kanban to-do app that helps users to organize *their tasks as sorting, moving amongst boards, setting task.*
+ Devised the project idea and designed UI.
+ Utilized ReactJS, CSS3, and Bootstrap to build the application.
+ Explored Firebase to create the database and manage the back-end side.
